Appln No. 10/713,086 Amdt. Dated May 28, 2004 Response to Office action of April 7, 2004

2

Amendm nts to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of producing a thermoelastic actuator assembly having desired operating characteristics, said thermoelastic actuator being made by a method which includesing the steps of:

determining a desired negative pressure pulse characteristic for the actuator; determining a heat dissipation profile corresponding to the desired negative pressure pulse characteristic; and

forming the thermoelastic actuator with a heat conduction means arranged to realize said profile.

- 2. (Currently Amended) A method The thermoelastic actuator according to claim 1, wherein the step of determining a desired negative pressure pulse characteristic includes a step of determining the physical qualities of a fluid to be used with the thermoelastic actuator.
- 3. (Currently Amended) A-method-The thermoelastic actuator according to claim 2, wherein the step of forming the thermoelastic actuator with a heat conduction means arranged to realize said profile includes forming one or more heat conductive layers in a passive bend layer of the actuator.
